W6200P

large format colour printer

*Bring your images to life
boldly and beautifully*

OFFICIAL PARTNER

The quality and speed you need for truly profitable printing

Your clients demand the highest colour quality for their large format printing projects. And you need the fastest print speed to make sure you can meet the tightest deadlines. Now the new Canon W6200P delivers the very best of both worlds. Combining powerful productivity with cost effective performance, it provides the ideal way to boost your business.

The W6200P offers a complete and professional printing solution to satisfy a wide variety of requirements. You benefit from full media flexibility, comprehensive colour emulation and management, UV fade-resistant printing - and more. All backed up by superior Canon support and service.

GET THROUGH MORE WORK IN LESS TIME

The W6200P guarantees an exceptionally high print speed, to give you a crucial competitive edge when it comes to delivering colour work. It prints a full colour A1 photo in an ultra fast 1.5 minutes*. This is achieved by combining bi-directional printing with Canon's innovative 1 inch-wide high density print head. The print head contains a remarkable 7,680 nozzles (1,280 per colour) enabling high-resolution printing over a wide area in a single pass, to save time. Also with Canon's advanced MicroFine Droplet Technology™ more drops are ejected in a shorter space of time, accelerating print speed even further.

** fast mode*

DELIVERING THE QUALITY YOUR CLIENTS DEMAND

Benefit from spectacular photo quality, with fresh, rich colours and fine, smooth gradations. Where the W6200P surpasses competitive printers is that it consistently delivers exceptional quality as well as speed. Once again, Canon's ingenious print head makes all the difference. Ultra-fine 8 pl ink droplets for each of the six colours are ejected with extraordinary precision, resulting in a high 1200 x 1200 dpi definition - with 1/6 density photo inks further reducing graininess. Thus ensuring superior accuracy and clarity for all your colour work.

FADE RESISTANT, PIGMENT INKS FOR LONG-LASTING PRINTS

When creating outdoor posters and banners, or photo prints that are exposed to bright lights, durable printing is essential - and that's exactly what you get with the W6200P. It uses high quality, full colour pigment inks that are UV resistant. They produce an unsurpassed level of colour fastness that is top in its class among comparable printers. The end result is large format printing that you can really rely on, in all circumstances. With bright, vivid images that look as good as the original - and stay that way.

BENEFIT FROM FULL BLEED

PHOTO PRINTING

True full bleed printing, without any white borders, gives added impact to all your photographic work, so that it stands out sharply in the setting of your choice. The W6200P supports full bleed output on all four edges for a variety of sizes, including 10" x 12" and 8" x 10" sizes as well as B2 and B3 formats. This borderless printing is fast, easy and completely mess-free - as ink that overflows from both sides is collected by platen grooves and directed to the maintenance cartridge by an intake fan.

EASY TO PLACE

SIMPLE TO USE

With its new, eye-catching design and small footprint, the compact W6200P fits perfectly in any surroundings - whether a state-of-the-art studio, shop or office environment. It can stand on its own stylish stand or be placed directly on a desktop. Everything has been designed to make this lightweight yet robust printer take up minimum space while providing maximum ease of use. A clear control panel makes every stage of operation simple. The unit takes cut and roll paper, with effortless manual switching between the two. Plus a media discharge guide folds away neatly when not in use.

CONTINUOUS INK SUPPLY

To enhance productivity and cost effectiveness, the W6200P features large capacity, 130 ml independent ink tanks. A continuous ink supply is ensured using a tubing system, while ink tanks can be replaced even during printing, for continuous output or extra-long printing.

There's an accurate 6-stage ink level detection system for problem-free printing and a user-replaceable maintenance cartridge that adds to overall ease of use.

PROVIDING PRODUCTIVE

NETWORK SUPPORT

The W6200P offers standard support for Windows and Mac environments via a multi-interface, so that it fits seamlessly into your network platform. To increase total throughput even further, optional interface boards enable USB 2.0 Hi-speed or IEEE 1394 support. A wide array of utilities are available to enhance productivity - including Canon's NetSpot® Suite software which enables integrated management of every printer connected to your network.

Canon's ingenious 1" wide print head ensures outstanding colour quality and print speed.

The 6-colour printing process leads to enhanced colour precision and greater tonal depth.

**ESSENTIAL FOR
PROFESSIONAL PHOTOGRAPHERS**

Your photographic work deserves to be seen in the very best light - with high quality, large format printing bringing out every detail beautifully. That's precisely what the W6200P delivers, including true full bleed printing for added impact.

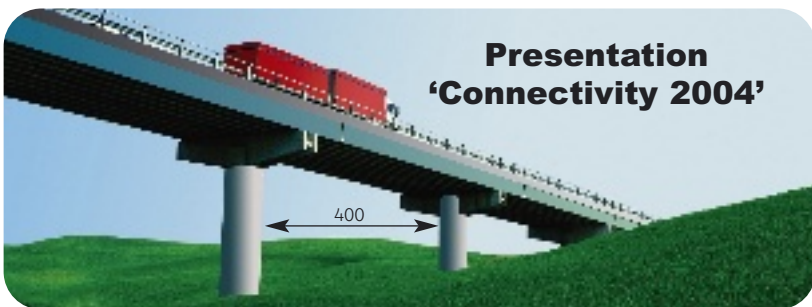

**PERFECT FOR
PHOTO SHOPS**

Now you can meet the demands of all your customers - on a wide range of media, with flexible formats. Combining productivity, quality output and ease of use in a compact design, the W6200P offers a sure-fire way to expand your business profits.

**IDEAL FOR
ADVERTISING AND DESIGN STUDIOS**

Don't let your big creative ideas down, by giving them the smallest chance. Let the W6200P bring them to life in the most impressive way possible. Designs, posters and all your work will look far better and what's more, with fade-resistant printing, last far longer.

**UP TO 24" PRINTING FOR
BUSINESS USE**

Marketing and sales departments will find the W6200P invaluable when it comes to presenting vital projects, with the added benefit of controlling costs and quality that in-house printing brings.

W6200P Specifications
